## 15 Free Healthcare Apps for Google Android

By Neil Versel

Once an upstart, Google's open-source Android operating system has grown into a formidable player in the world of smartphones. And with the growth in its user base has come a flood of apps. While the quantity of apps available in the Android Market isn't in the same league as what iPhone users can find in the Apple App Store, the quality certainly is there.

With a little help from Google and an app developer or two, *FierceMobileHealthcare* has compiled a list of free and interesting healthcare-related apps that help make the lives of healthcare professionals and patients a little easier. Click on any of the links below or the images above to get started.

1. [Epocrates Rx](#)
2. [Calculate by QxMD](#)
3. [PubMed Mobile](#)
4. [Skyscape Medical Resources](#)
5. [Relief Central](#)
6. [Mini Nurse - Lite](#)
7. [Hospital Intel](#)
8. [USA Graduate School: Medical](#)
9. [National Comprehensive Cancer Network Guidelines](#)
10. [iTriage Mobile Health](#)
11. [Heart Rate Monitor](#)
12. [Glucose Meter](#)
13. [MedPage Today Mobile](#)
14. [Prescriber's Letter](#)
15. [FierceMarkets](#)

## Epocrates Rx

One of the most popular healthcare smartphone and PDA apps of all time, Epocrates Rx is a continuously updated drug database that doctors, nurses and other professionals can use to pull up medical information--such as whether certain drugs have potentially harmful interactions--on the fly. While the Android app is still in beta, it contains the same monographs, photos to help identify medications by physical characteristics and database of approximate retail prices for more than 3,000 drugs as the iPhone and BlackBerry versions.
